

M RAYHAN

rayhan6355@gmail.com | github.com/rayhan-404 | linkedin.com/in/rayhan-404 | Khulna, Bangladesh

PROFESSIONAL SUMMARY

Computer Science & Engineering student at North Western University, Khulna, who builds small, real software end to end — from Android utilities in Kotlin to web tools in Next.js and TypeScript. Works comfortably across Python, C++ and JavaScript, with habits formed by shipping: version control from the first commit, clean project structure, and iterating until the thing actually works. Curious about artificial intelligence, robotics and electronics, and currently expanding into machine learning and Linux.

EDUCATION

B.Sc. in Computer Science & Engineering

North Western University, Khulna | Ongoing

PROJECTS

All public at github.com/rayhan-404 — every project below is a real, working repository.

UniSync — Kotlin

Offline-first university routine scheduler with academic task tracking and notifications, designed to work without an internet connection.

p2p-secret-messaging — Kotlin

Peer-to-peer messaging app for direct, private conversations between devices.

NWU Cover Page Generator — HTML · CSS · JavaScript

Web tool that generates formatted assignment cover pages for North Western University coursework.

Encrypt-Decrypt-Message — Python

Utility for encrypting and decrypting plain-text messages.

Portfolio Website — Next.js · TypeScript · Tailwind CSS

Personal portfolio with a live GitHub-backed projects grid, a passcode-protected admin panel, and a real-time GitHub contribution calendar.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express, REST APIs

Database: MongoDB, SQL

Tools: Git, GitHub, Figma, Postman, Docker

CURRENTLY LEARNING

Machine Learning · TensorFlow · Linux

INTERESTS

Artificial intelligence, robotics, electronics, and understanding how things work — from phones and gadgets to the universe behind the screen.
